Passionate senior software engineer with over 5 years of experience in building scalable mobile applications. Eager to join a company to make an impact and help develop beautiful user experiences while maintaining a fully tested and well architected codebase. I am always trying to learn and give back to the community through technical articles and public speaking at international conferences.

## MOST RECENT WORK EXPERIENCE

---

### iOS Software Engineer (promoted to Senior)

BBC iPlayer

September 2021 - Present

#### Responsibilities

- Play an important role in the architecting and decision making of new features.
- Mentor other members of the team and help onboarding new starters.
- Facilitator of a cross-product iOS team looking for opportunities to use SwiftUI within our products.

#### Key Achievements

- Significantly modernising the CI and build tooling in the product space.
- Successfully rewriting legacy features into new modules using modern iOS technologies.
- Helping shape up the architecture of key parts of the application.
- Introducing a first SwiftUI component in the application and making use of SwiftUI previews to speed up development and feedback.
- Introducing and successfully pitching the idea of a Home Screen widget to stakeholders, making it into a prioritised piece of work.
- Working successfully with designers in a major UI refresh of the application.

## PREVIOUS WORK EXPERIENCE

---

### iOS Software Engineer

Student Beans

April 2020 - September 2021

### iOS Junior Software Engineer

Music Tribe

August 2018 - April 2020
